

1.1 Installing the wallet:

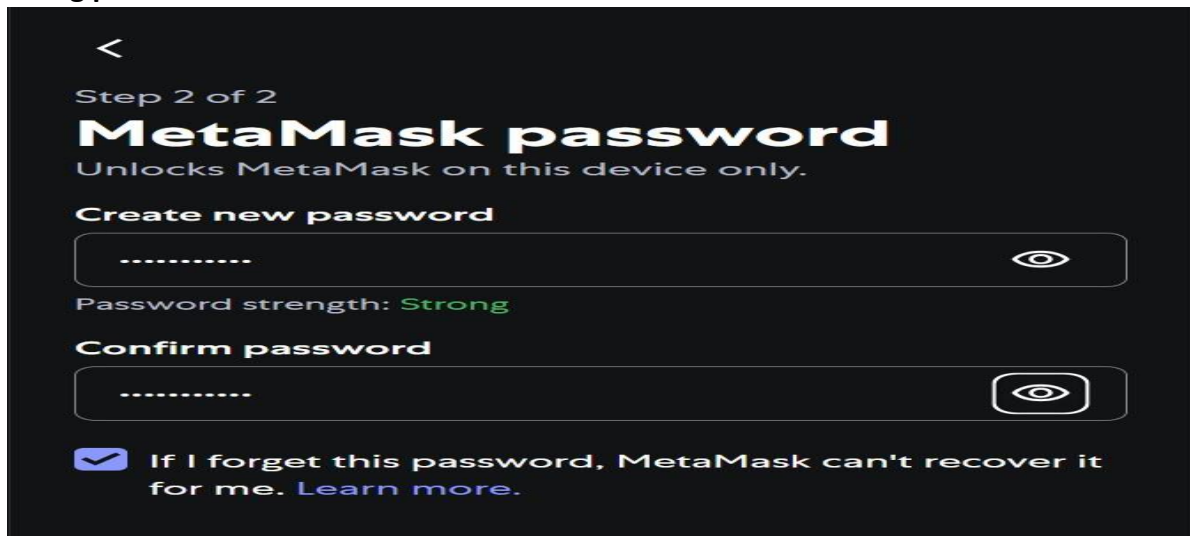

1.2 Securely back up your seed phrase.

Back up phrase:

Strong password

<

Step 2 of 2

MetaMask password

Unlocks MetaMask on this device only.

Create new password

..... 

Password strength: **Strong**

Confirm password

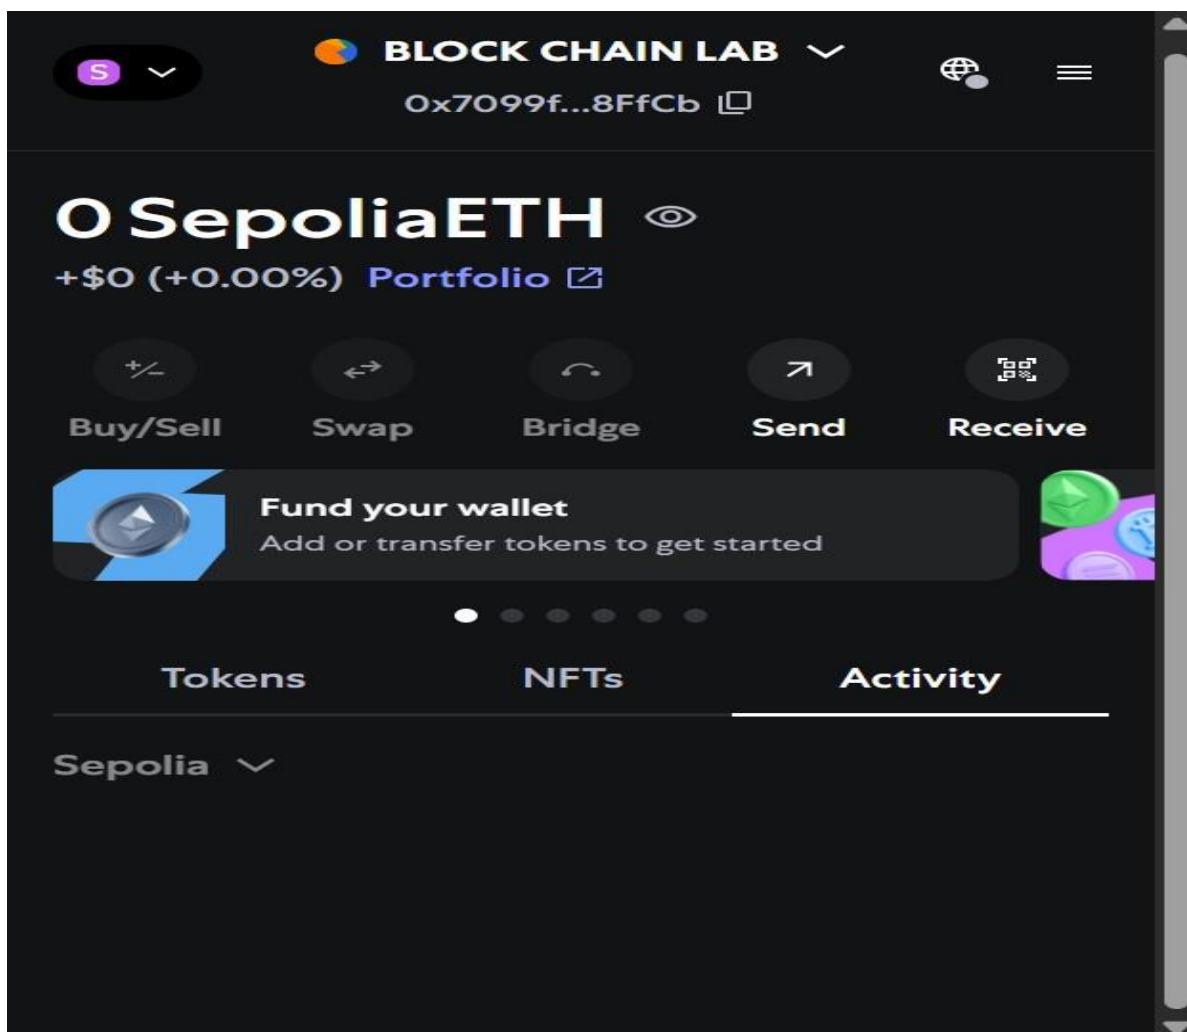

..... 

☒ If I forget this password, MetaMask can't recover it for me. [Learn more.](#)

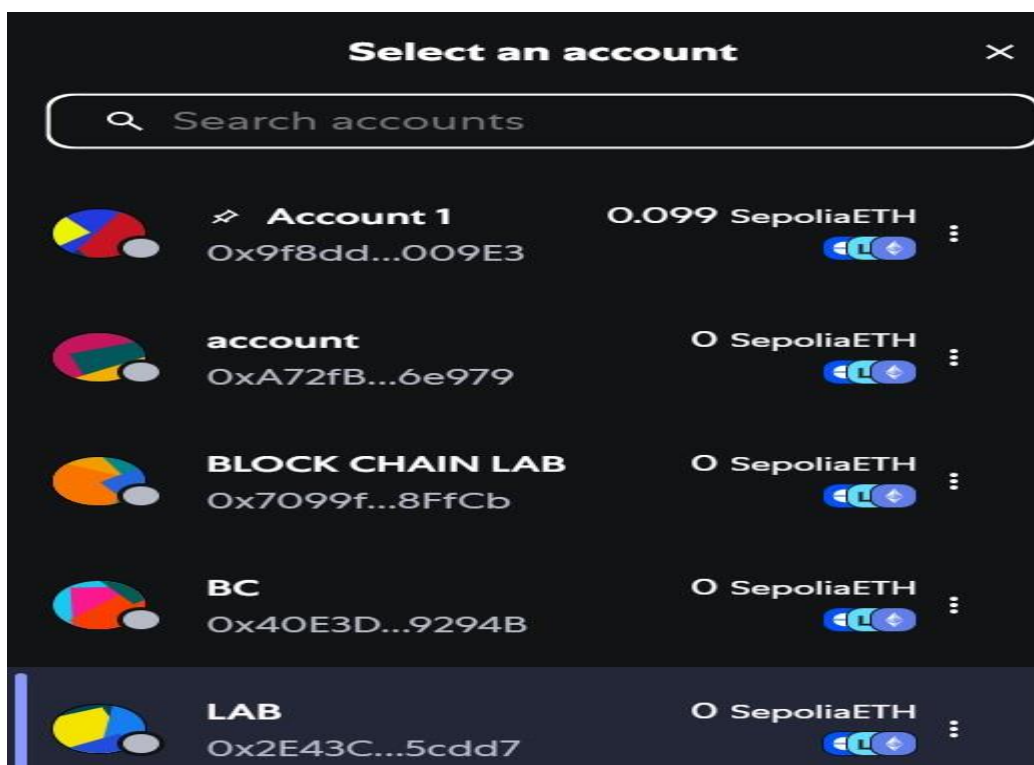

1.3 recovered account

[0x9f8dd22320ef5b37ffD2E04E8ffB0745D2009E3](#)

1.4 New accounts:

MORE ADRESS/Accounts:

Adress:

1.[0x9f8dd22320ef5b37fFfD2E04E8ffB0745D2009E3](#)

2.[0xA72fBE4182B913f664296bb5cd43EAe28Bb6e979](#)

3.[0x7099fF031b184940F4DE7B065701B0b09978FfCb](#)

4.[0x40E3Dc3C3a27b94C041Dd7969F62F7A481b9294B](#)

In the first step the wallet has been installed and the test net accounts are been created .
As the wallet is re installed the original account is recovered by the seed phrase And more
accounts are created and the account address is given.

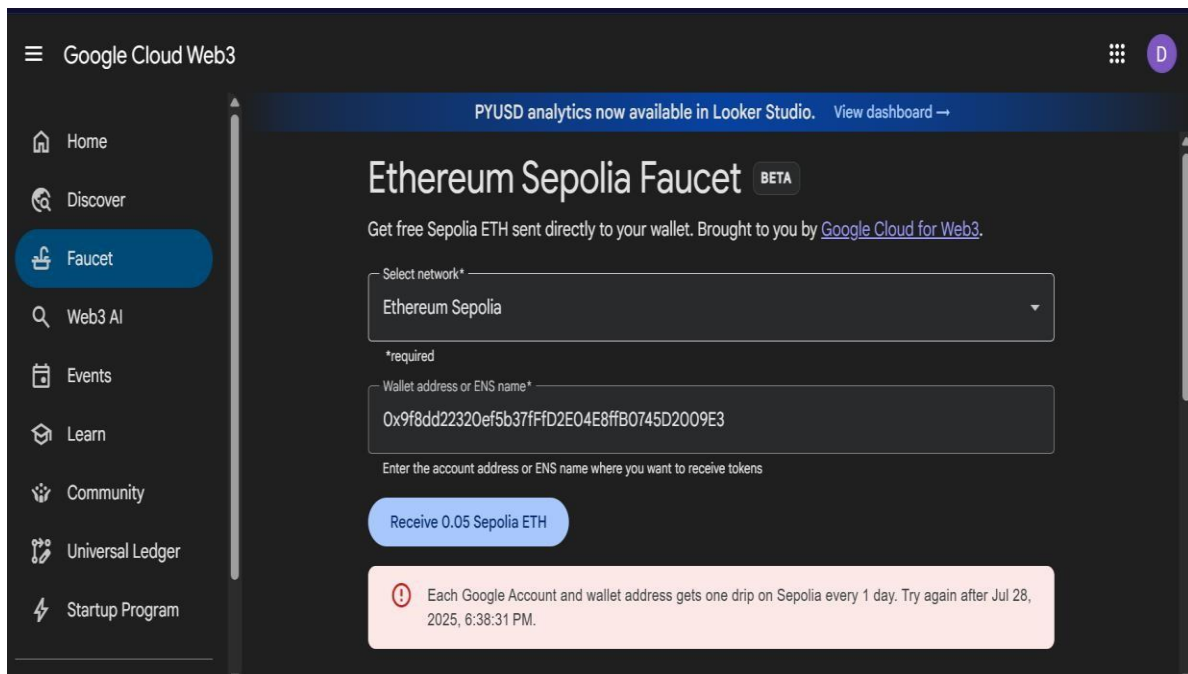

Step 2: Acquire Test Tokens via Faucet

Visit a faucet website appropriate for your chosen testnet:

- Paste your wallet address and request test tokens.
- Wait for the transaction to complete.
- Capture the transaction hash and wallet balance update.

2.1 Test tokens:

Wallet address: [0x9f8dd22320ef5b37fFfD2E04E8ffB0745D2009E3](#)

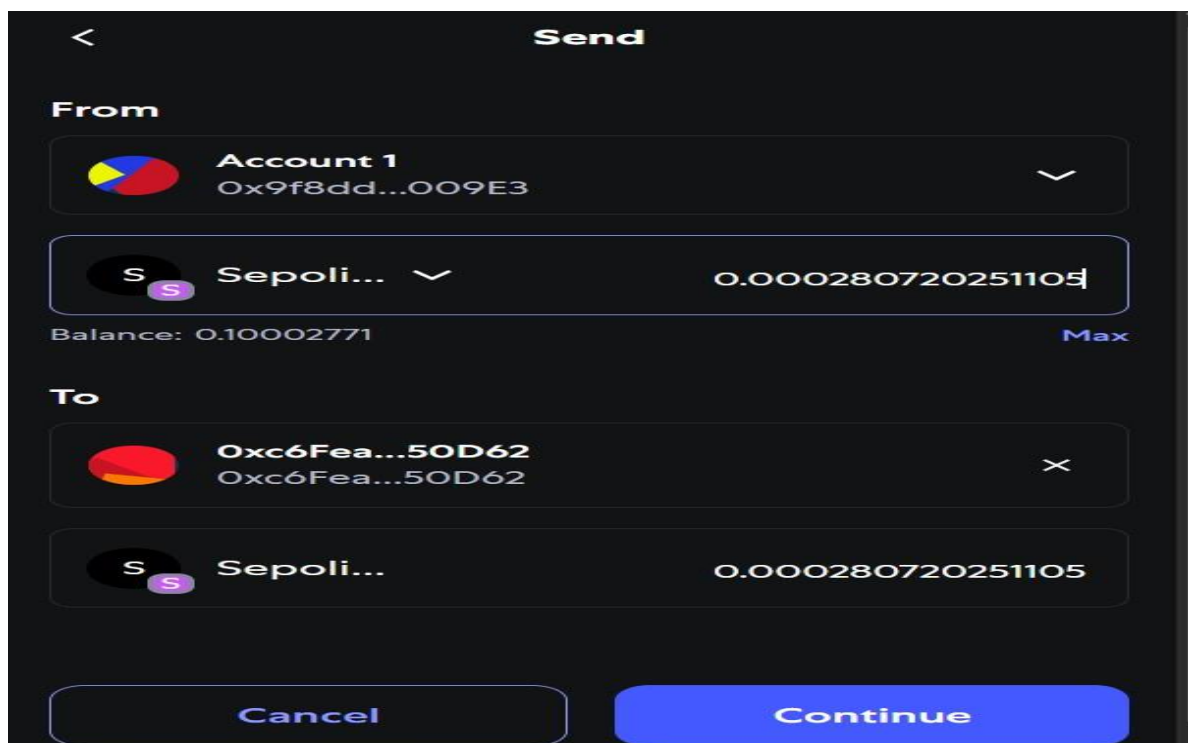

There was a transaction that have happened early in the Account 1 so we can only get the sepolia every one day .here ETH is obtained using testnet

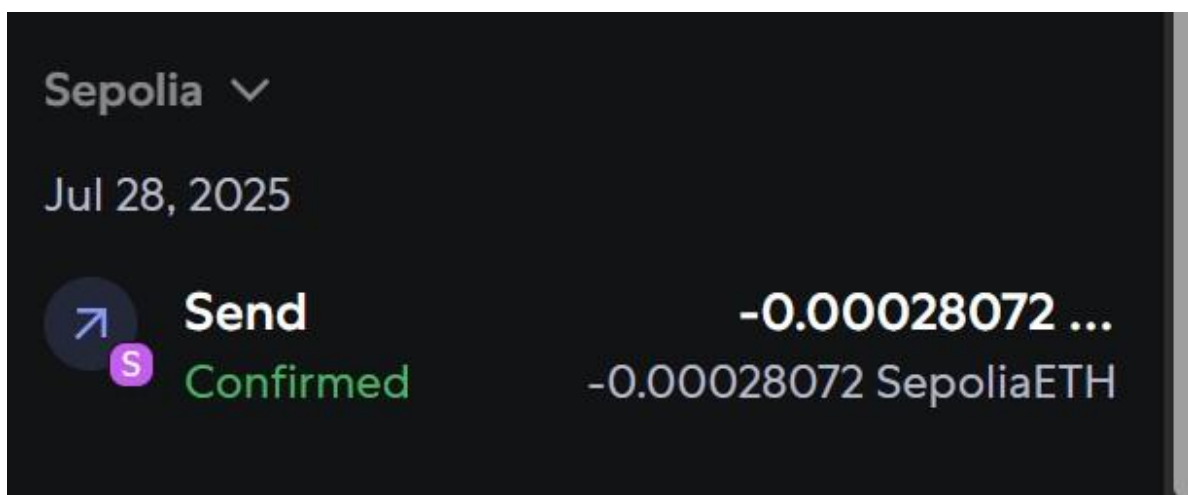

Step 3: Test Transactions to the given address

- Transfer 0.000280720251105 ETH to 0xc6Fea06FdBe2c780Db5bcc155b789D5463f50D62.
- Transfer any other value to the same account.
- Capture the transaction hash and wallet balance update.

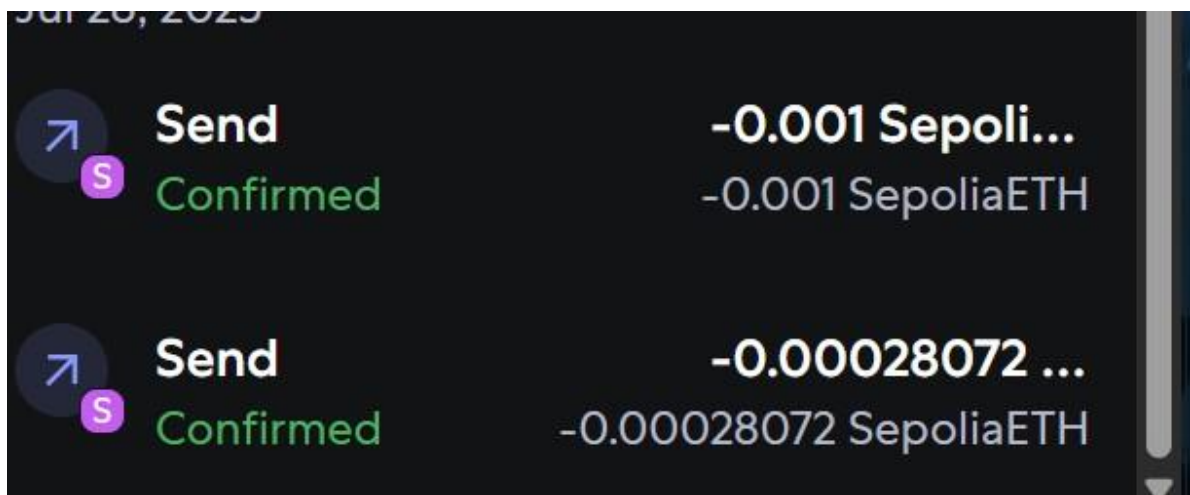

3.1 Transfer ETH to 0xc6Fea06FdBe2c780Db5bcc155b789D5463f50D62

Confirmed transaction :

2nd transaction :

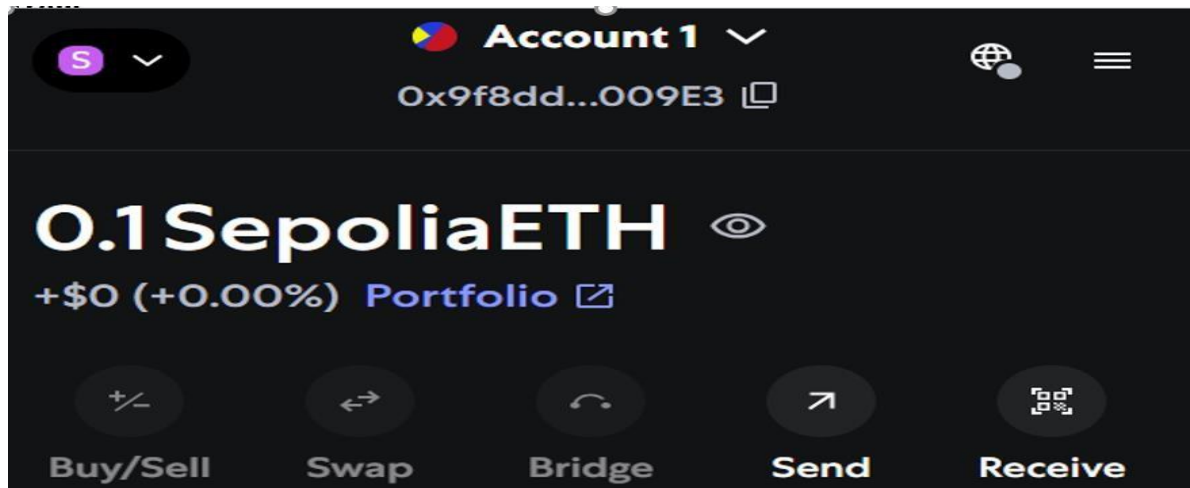

transaction hash:

1. [0xff6d758479ea98193ac63e93366a888d58f4763e454cf405cac9fba12f13fb90](#) 2.

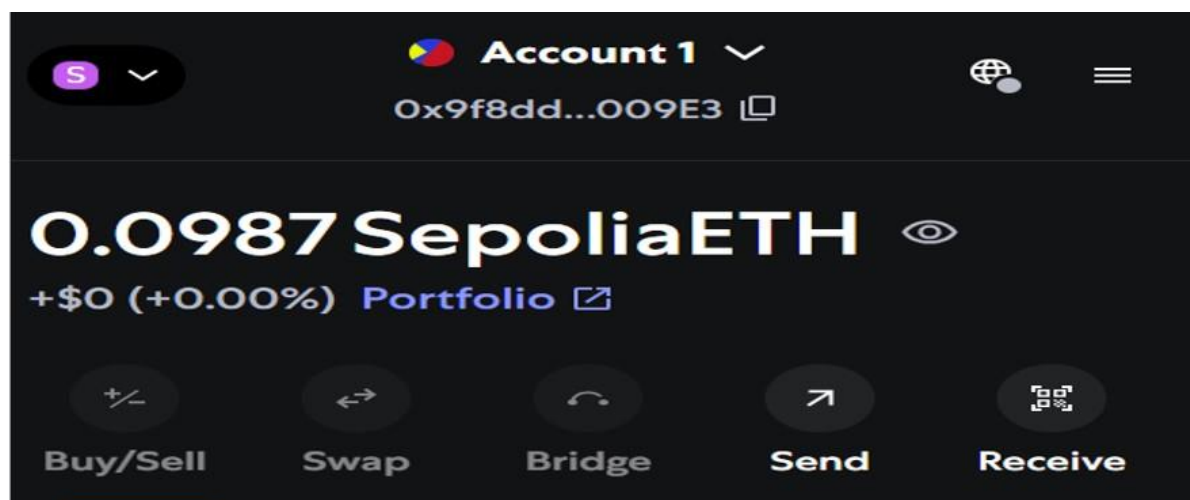

[0x859453cd34f736f57a59e378ad368b3d33609f21feb3bbbd0d541483beaae5c6](#)

wallet balance update.

From this:

To this:

Step 4: Use a Blockchain Explorer

Open the appropriate blockchain explorer:

- Sepolia: <https://sepolia.etherscan.io/>
-
- Paste your transaction hash to view transaction details:
 - Transaction Hash
 - Timestamp
 - Sender and receiver
 - Gas fee
 - Status
- Paste your first address and list down all details you see regarding your address.

Take a screenshot and briefly describe what each field represents.

4.1 Transaction details of first account
